

Dr. Thanassoulas, C. received:

- B.Sc. Degree in Physics (1967) from Athens University, Greece.
- Diploma as a System Analyst – Software Programmer from G.P.C (1972) Athens, Greece.
- M.Sc. Degree in Applied Geophysics (1976) from Leeds University, UK.
- Ph. D. Degree in Applied Geophysics (1983) from Thessaloniki University, Greece

He worked from 1973 to 2006 (year he retired) at the Institute for Geology and Mineral Exploration (IGME) at the Geophysical Department, Athens, Greece.

During his 33 years of professional carrier at IGME he was involved in a large number of research projects such as: mineral exploration, geothermal exploration, hydrogeological studies, projects of engineering geology and large scale projects (gravity – magnetics) for tectonic studies and petroleum exploration.

He has published a large number of papers, related with the topics he worked on, in scientific journals such as: Journal of Sound and Vibrations, Geophysical Prospecting, Geothermics, Tectonophysics, Geoexploration, Mineral Wealth, Computers and Geosciences and has written a large number of "Open File Reports" on scientific topics of IGME projects.

Among his other interests are: music, electronics and computers (hardware and software).

Since 2006, when he retired, his scientific interests have been mainly concentrated on "Short-term Earthquake Prediction".
